SUMMARY

Seeking a position in a dynamic organization where I can apply my skills to achieve organizational goals. Highly organized, dedicated, and eager to embrace challenges. Strong interpersonal skills, a positive attitude, and a passion for learning new technologies.

SKILLS

Linux Administration: Expertise in managing Linux-based environments, including system installation, configuration, and maintenance. Skilled in shell scripting, process automation, and security hardening.

AWS Cloud Services: Proficient in deploying, managing, and scaling infrastructure on AWS using services such as EC2, S3, RDS, IAM, CloudFormation, and Lambda. Experience with auto-scaling, load balancing, and VPC configuration.

Docker & Containerization: In-depth knowledge of containerization using Docker. Expertise in building, deploying, and managing containerized applications. Skilled in creating and managing Dockerfiles, Docker Compose, and optimizing images.

Kubernetes: Hands-on experience with Kubernetes for orchestrating containerized applications. Expertise in managing clusters, configuring services, and deploying applications. Proficient in Helm charts and ensuring scalability and resilience.

Git & Version Control:

Control: Proficient in version control using Git. Experience with branching strategies, managing repositories, and collaborating in CI/CD pipelines. Familiar with GitLab, GitHub, and Bitbucket workflows.

CI/CD & Automation: Implemented and maintained continuous integration/continuous deployment pipelines using Jenkins, GitLab CI, or similar tools. Automated builds, testing, and deployments to streamline DevOps workflows.
